Manufacturers win big at Chamber awards

25 April 2018

Chase Chamber of Commerce members, Addfield Environmental Systems, were named winners of the Excellence in Manufacturing and Excellence in International Business categories at the Greater Birmingham Chambers of Commerce annual awards.

The winners were named alongside over all winners Curium Solutions, who were named Business of the Year, sponsored by National Express.

The company, formed 10 years ago by Andy Dawson and James and Adam Farrow, now employs 30 people at its headquarters in Innovation Court, Edmund Street.

Case Study

INVEST IN GREAT
BRITAIN & NORTHERN IRELAND

A Staffordshire-based manufacturer has completed its biggest export deal to date, supplying Pakistan with 13 medical waste incinerators, with support from DIT.

Addfield Environmental Systems Ltd's machinery ensures the complete destruction of harmful waste while significantly reducing its negative environmental impact.

Due to delivery and commissioning early this year, these machines will have a dramatic impact on the environment in Pakistan while also creating jobs and reducing strain on the medical system. Waste incinerators have already been seen in areas where similar incinerators have been installed.

Addfield's export business has soared during the past three years, increasing from 20 per cent of turnover to over 65 per cent. The company now exports to 19 countries and predicts this will grow by as much as 50 per cent in the next two years.

This is the latest export success for Addfield, which has worked with DIT for the last five years as it launched a strategic plan to increase its overseas contracts. The business now supplies to a number of health organisations and government bodies across the world including Benegal, Cambodia, Nigeria, Guinea and Mexico, and is recognised for the quality of its equipment and compliance with international emission standards.

There is currently a renewed focus on the importance of strong biodiversity measures around waste generated by clinics, pharmacies and hospitals in many countries and agencies following recent fire outbreaks including Ebola.

Addfield has utilised the full spectrum of DIT support to focus their export plans, which includes attending workshops and meetings to further its international awareness and received advice on making its company website relevant for a global audience.
